Presenting our first Intensive Course Series March 16 – 20, 2020

5 days of continuing education courses - *Attend any or all*

MONDAY March 16, 2020:

INTRO TO CARDBOARD CARPENTRY

Explore the basics of cardboard carpentry and its application to adaptive design. Learn material fundamentals and basic construction techniques. Make an adaptation to take with you.

WEDNESDAY March 18, 2020:

CARDBOARD CARPENTRY FROM SCRATCH

Translate a set of design specifications and measurements to cardboard to produce a functional adaptation. Group problem-solve, share the workload and create tangible impact!

THURSDAY March 19, 2020:

DESIGN & CUSTOMIZE WITH CARDBOARD

Practice turning an observed problem or un-met need into an opportunity for change! See the power of teamwork to spark creative ideas in one another. Create 3D prototypes that can be adapted to different circumstances or changing needs.

TUESDAY March 17, 2020:

SEATED POSITIONING

The most often-requested adaptations at ADA relate to positioning. Learn to see the link between good positioning and maximal function. Armed with a little basic anatomy and ergonomic principles, some tips on spotting positioning red flags, and a try-again attitude, you can create realistic, customized solutions not achievable with off-the-shelf equipment!

FRIDAY March 20, 2020:

SWITCHES & ELECTRONICS

Learn the basics of simple switches and their application to adaptive design. Work with conductive materials and learn to solder. Then build battery interrupters and custom switches, assemble 3D-printed custom switches, and switch-adapt off-the-shelf toys!

Each 1-day course:

\$250. including materials

10 AM – 4 PM

313 West 36th St., New York NY 10018
